

Archivebox

[Link 1](#) | [Link 2](#)

```
version: '3.3'

services:
  archivebox:
    image: archivebox/archivebox:latest
    command: server --quick-init 0.0.0.0:8102
    ports:
      - 8102:8102
    environment:
      - ALLOWED_HOSTS=*                # add any config options you want as env vars
      - MEDIA_MAX_SIZE=750m
    volumes:
      - /srv/path/Files/Archivebox/data:/data
    restart: unless-stopped
```

To create an admin user : create a docker-compose.yml, cd to its folder, and run `docker-compose run archivebox manage createsuperuser` .
Erase newly and nonfunctional created container.
