

ClipBucket

[Github](#)

ClipBucket is an Open Source and freely downloadable PHP script that will let you start your own Video Sharing website (YouTube/Netflix Clone) in a matter of minutes. ClipBucket is the fastest growing video script with the most advanced video sharing and social features.

Optionnal:

```
mkdir -vp Clipbucket/{db,files} \  
&& chmod -R 777 Clipbucket/ \  
&& chown -R 998:100 Clipbucket/
```

Docker-compose:

```
services:  
  clipbucket:  
    restart: unless-stopped  
    pull_policy: always  
    environment:  
      - DOMAIN_NAME=192.168.1.104:6598  
      - MYSQL_PASSWORD=  
      - PUID=998  
      - GUID=100  
    volumes:  
      - /srv/dev-disk-by-uuid-7fe66601-5ca0-4c09-bc13-a015025fe53a/Files/Clipbucket/db:/var/lib/mysql  
      - /srv/dev-disk-by-uuid-7fe66601-5ca0-4c09-bc13-a015025fe53a/Files/Clipbucket/files:/srv/http/clipbucket  
    ports:  
      - 6598:80  
    container_name: clipbucket  
    image: oxygenz/clipbucket-v5  
  networks: {}
```
