

Clipface

[Link](#)

```
version: '3.3'
services:
  clipface:
    container_name: clipface
    volumes:
      - '/srv/path/Files/Clipface/clips:/clips'
    ports:
      - '1314:80'
    environment:
      - CLIPFACE_USER_PASSWORD=xxxxxxxxxx
      - 'CLIPFACE_CLIPS_PAGE_TITLE=Taytay'
      # - CLIPFACE_SECURE_COOKIES=false
    image: 'tomsan/clipface:latest'
    restart: unless-stopped
```

`secure_cookies` - If set to true (which is the default value), the "secure" setting will be used for the authentication cookie, which means the cookie will only be included when using SSL (HTTPS). If you are not using SSL, you need to set this option to false, or authentication won't work.

Default value: `true`

Environment variable: `CLIPFACE_SECURE_COOKIES`
