

# Movie Roulette

## Github

Can't decide what to watch? Movie Roulette helps you pick random movies from your Plex and/or Jellyfin libraries, with features like cinema poster mode, service integrations, and device control.

## Container Images

Registry	Architecture	Version	Image Path
Docker Hub	AMD64	Latest	sahara101/movie-roulette:latest
Docker Hub	ARM64/ARMv7	Latest	sahara101/movie-roulette:arm-latest
GHCR	AMD64	Latest	ghcr.io/sahara101/movie-roulette:latest
GHCR	ARM64/ARMv7	Latest	ghcr.io/sahara101/movie-roulette:arm-latest

Instead of latest you can also use the version number.

```
services:
  movie-roulette:
    image: #See above
    container_name: movie-roulette
  ports:
    - "4000:4000"
  volumes:
    - ./movie_roulette_data:/app/data
  restart: unless-stopped
```

Visit `http://your-server:4000` and configure your services.
