

NeonLink

Link

First, create an empty `bookmarks.sqlite` file in the installation folder (i.e. `/srv/disk/files/neonlink`)

- Replace `{80}` with any port you like.
- Replace `{/path/to/bookmarks.sqlite}` with the absolute path to the `bookmarks.sqlite` file you created earlier.
- Replace `{/path/to/backgroundimages}` with the path to folder with background images

Then run the docker-compose.

```
version: "3.8"

services:
  neonlink:
    image: alexscifier/neonlink
    container_name: neonlink
    volumes:
      - ./bookmarks.sqlite:/app/db/bookmarks.sqlite
      - ./background:/app/public/static/media/background
    restart: unless-stopped
    ports:
      - "80:3333"
```
