

# Portall

[Github](#)

## ? Portall - Port Management System

Portall provides an intuitive web-interface for generating, tracking, and organizing ports and services across multiple hosts.

## ? Setup

### Docker Run

```
docker run -p 8080:8080 \  
  -e SECRET_KEY=your_secret_key \  
  -e PORT=8080 \  
  -v ./instance:/app/instance \  
  Portall
```

### Docker Compose

```
version: '3'  
services:  
  portall:  
    image: need4swede/portall:latest  
    container_name: portall  
    ports:  
      - "8080:8080"  
    environment:  
      - SECRET_KEY=your_secret_key  
    volumes:  
      - ./instance:/app/instance
```
