

QDirStat

[Github](#)

Docker container for QDirStat

This project implements a Docker container for [QDirStat](#).

QDirStat is a graphical application to show where your disk space has gone and to help you to clean it up.

The GUI of the application is accessed through a modern web browser (no installation or configuration needed on the client side) or via any VNC client.

```
version: '3'
services:
  qdirstat:
    image: jlesage/qdirstat
    ports:
      - "5800:5800"
    environment:
      - USER_ID=998
      - GROUP_ID=100
      - LANG=fr_FR.UTF-8
      - TZ=Europe/Paris
    volumes:
      - "/path/to/Files/Qdirstat/config:/config:rw"
      - "/srv:/storage:ro" #root folder to be browsed
```
