

Reiverr

[Link](#)

The easiest and the recommended way to install Reiverr is via Docker. Make sure to update the api keys and base URLs to match your setup.

Radarr & Sonarr API keys can be found under Settings > General in their respective web UIs. Jellyfin API key is located under Administration > Dashboard > Advanced > API Keys in the Jellyfin Web UI.

```
version: '3.8'

name: reiverr

services:
  reiverr:
    image: ghcr.io/aleksilassila/reiverr:latest
    container_name: reiverr
    ports:
      - 9494:9494
    volumes:
      - /path/to/appdata/config:/config
    restart: unless-stopped
```
