Piracy Megathread

MEGATHREAD

Alternative megathread [here](#) (original [reddit thread](#)) or at **/r/FREEMEDIAHECKYEAH** (more than just piracy).

If you have any critique or suggestions you would like to see added to the Megathread, or would like to be granted contribution privileges, send us a mod mail [here](#) (If link doesn't work, then just send a private message with /r/Piracy as the recipient).

Make sure your adblocker is on before visiting any of the linked websites. uBlock Origin is recommended (See the `Tools` page below).

? Related / Alternative Subreddits

> " List of related and alternative subreddits, either centered around piracy or around technologies that tie in with piracy

? Tools / Useful Apps & Extensions / Web Services

> Activation tools, useful applications, userscripts, download managers and helpers/tools and other miscellaneous

? Mobile Apps & Cracked App Markets/Repos

> " Apps and resources for Android and iOS

? Games

> " Sites for downloading games and ROMs

? Movies & TV / Sports

> " Sites for streaming and downloading/torrenting Movies & TV and Sports

? Software Downloads

> " Sites for obtaining popular cracked software

? Books / Comics / e-learning / Other Reading Material

> ❝ Books, comics, manga, magazines, courses & tutorials

? Music

> ❝ Sites & apps for downloading music, video game soundtracks/scores

? Porn

> ❝ Pirate porn sites

? Private Trackers

? Miscellaneous

? General-Purpose Sites / Search Engines

> General-purpose torrent sites. Torrent search engines/aggregators/DHT crawlers are listed to search within as many publicly listed torrents as possible to find rare content that cannot be found in any of the trackers listed in the above categories.
>
> When using torrent search engines/DHT crawlers, they will list as many publicly available torrents as possible, unfiltered and unfettered in regards to viruses. Never use thse to search for software, but when searching for other media types, take some **preliminary measures** to avoid running malware.

? Alternative piracy resources compilations

- [Awesome-piracy](#)

Notes on software and sites to avoid:

- Try to avoid the pirate bay if you can (for software/games), it is filled to the brim with malware torrents. [Skulled users are not trustworthy either.](#)
  - You can still use The Pirate Bay safely when searching for other media types (video, audio, etc.) [if you follow some basic steps.](#)
- uTorrent [has bundled malware (a bitcoin miner) into the software in the past](#). The company developing this software is not trustworthy. Bittorrent (the torrent client) is owned by the same company.
- [Bitlord (torrent client) is malware.](#)
- [Soda Stream is malware.](#)
- [Sidify/Allavsoft are scams - They are not able to download from spotify in any way, and instead record the streams or download from alternative platforms, like youtube.](#)
- Peerblock is garbage and placebo software. Peerblock's blocklists are not accurate in any way and is not able to discern between the IP of a normal user and that of a copyright troll.

Credits to /u/Klappa4Me for doing a lot of the heavy lifting.
